Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues Takatani does not disclose "one time slot is used for multiple terminals simultaneously". The examiner couldn't find the quoted statement in any of the claims. In claim 1, applicant states "at a timing other than a timing when a time division communication" which is not the same as the normal communication stated in the preamble. Furthermore, Applicant argues Takatani makes his statement in a paragraph that pertains to TDMA not CDMA. The examiner disagrees. In paragraph 0004, Takatani clearly states GSM networks, are being replaced by 3rd generation system, such as universal mobile telecommunications standard (UMTS) network which uses a combination of CDMA and TDMA technologies to make highly efficient use of spectrum.
